

Nguyen Do Trung Kien

Software Engineer (Full-Stack)

✉ trungkiennguyen040102@gmail.com ☎ +84 974821498 📍 Binh Thanh district, HCM city
🌐 LinkedIn 📅 2002-01-04

SUMMARY

Software Engineer with expertise in the .NET ecosystem and a strong focus on System Design and Database Architecture. Proven track record in performing Requirement Analysis and building scalable, high-performance systems for the healthcare, banking, and e-commerce sectors. Highly adaptable and actively expanding into full-stack development, utilizing Java, ReactJS, and NestJS. Proficient in optimizing data retrieval through Stored Procedures. Adept at integrating AI tools (ChatGPT, Google Gemini, AI Stitch, Antigravity) to independently analyze business flows, automate database processing, and accelerate UI/UX development, resulting in a 50% improvement in coding efficiency and rapid mastery of new technologies.

WORK EXPERIENCE

Software Engineer (Full-Stack) 11/2025 – Present
HEALTHCARE SOLUTION VIETNAM

- Lead the end-to-end full-stack development (ReactJS, NestJS) and database design for enterprise-level applications, entirely replacing legacy UI/UX with modern architectures.
- Architect and optimize real-time, event-driven systems (WebSocket, Event Routing) to handle high concurrency and ensure data consistency across multiple environments.
- Leverage AI/LLM integration (Prompt Engineering, Tool Calling) and third-party cloud services (Cloudinary) to significantly boost system performance, document searchability, and operational efficiency.
- Authored and managed complex Stored Procedures to offload heavy synchronization logic, ensuring absolute data integrity.

Software Engineer (.NET) 08/2024 – 09/2025
KYANON DIGITAL

- Successfully transitioned from an internship and probationary role by consistently delivering high-quality work, earning management trust to take ownership of critical project tasks.
- Maintained and enhanced the OCBC point redemption application for OCBC Singapore Bank.
- Developed Discount Bites, a discount food ordering application, using Strapi and Node.js.
- Optimized and extended the Tangs e-commerce platform by refactoring event-handling logic and improving system performance.

KEY PROJECTS

Smart Office 04/2026 – Present

- Tech Stack: ReactJS, NestJS, TypeORM, SQL Server, WebSocket, Cloudinary, LLM.
- Description: An enterprise smart office suite with document workflows, real-time communications, and AI-driven capabilities.
- Outcome:
 - + Full-Stack Development: Built the application from scratch using ReactJS and NestJS for a modern UI/UX and robust backend logic.
 - + Digital Signature Engine: Implemented a dynamic in-memory PDF signature engine, eliminating paperwork and reducing turnaround from 2-5 minutes to 100ms.
 - + Cloud Storage & Security: Accelerated file uploads via Direct Upload (slashing load times from minutes to 100ms) and achieved 100% secure access via time-bound cryptographic URLs.
 - + Real-time & Concurrency: Architected a WebSocket notification system and eradicated DB-level race conditions, ensuring zero data loss and 100% transactional integrity under high load.
 - + AI Chatbot Efficiency: Enabled instant semantic searches across document libraries, significantly reducing OpenAI API costs and latency by strictly enforcing token boundaries.

Benh Vien Y Hoc Co Truyen 11/2025 – 03/2026

- Tech Stack: NodeJs, SQL Server.
- Independently designed the database schema to ensure data integrity and optimized storage space.
- Developed and optimized Stored Procedures for robust CRUD operations tailored to specific healthcare business requirements.

- Authored comprehensive and standardized API documentation using Swagger to facilitate seamless front-end integration.

DiscountBites

01/2025 – 09/2025

- Description: A discount food ordering application.
- Tech Stack: Strapi, Node js, PostgreSQL.
- Outcome:
 - + Developed merchant product recommendations based on distance using latitude, longitude, and GeoHash.
 - + Enhanced user experience by accurately suggesting relevant nearby restaurants.
 - + Built custom APIs for Search, Favourite Merchant, Product, Category, Home-Customer, and Home-Merchant.

Client: Singapore.

OCBC

11/2024 – 12/2024

- Description: A loyalty point redemption application for OCBC Bank Singapore.
- Tech Stack: .NET Core, PostgreSQL, Redis, SignalR.
- Outcome: Developed Concurrent Login Detection leveraging Redis and refactored source code to improve system maintainability and performance.
- Website: <https://marketplace.stackreward.com> | Client: Singapore.

Tangs

08/2024 – 10/2024

- Description: Large-scale e-commerce platforms.
- Tech Stack: .NET Core, PostgreSQL, Kafka.
- Outcome: Refactored event-handling logic for Unbxd and wrote unit tests to ensure code reliability.
- Website: <https://tang.com> | Client: Singapore.

SKILLS

Programming Languages

C#, Java, JavaScript/TypeScript, ReactJS (basic).

Database

PostgreSQL, MySQL, MS SQL Server, Database Design, Stored Procedures.

Security & Performance

Authentication & Authorization, JWT, CORS, Retry, Rate Limiting, Hangfire, Redis Cache,

Soft Skills

Requirement Analysis, Logical thinking, Teamwork, Problem-solving, Quick adaptability, Communication, Effective time management.

Backend

.NET Core, NestJS, Node js, Restful API, DTO, Clean Architecture, Middleware, CQRS. Kafka, WebSocket.

AI & Tools

ChatGPT, Google Gemini, AI Stitch, Antigravity, Git, GitHub, GitLab, Docker, SCP Deployment, Postman, Swagger.

Testing

Unit Testing, SonarQube, Logs/Logging.

EDUCATION

Bachelor's Degree, Information Technology

2020 – 2024

HUTECH University

Software Technology

CERTIFICATIONS

English Level B1 (CEFR)

HUTECH 07/06/2024

Communication and Teamwork Skills (CEFR)
