

NGUYEN DO TRUNG KIEN

SOFTWARE ENGINEER (FULL-STACK)
Location: Binh Thanh district, HCM city
Email: trungkiennguyen040102@gmail.com | Phone: +84 974821498 | [LinkedIn](#)
Date Of Birth: 04/01/2002

SUMMARY

Software Engineer with expertise in the .NET ecosystem and a strong focus on System Design and Database Architecture. Proven track record in performing Requirement Analysis and building scalable, high-performance systems for the healthcare, banking, and e-commerce sectors. Highly adaptable and actively expanding into full-stack development, utilizing Java, ReactJS, and NestJS. Proficient in optimizing data retrieval through Stored Procedures. Adept at integrating AI tools (ChatGPT, Google Gemini, AI Stitch, Antigravity) to independently analyze business flows, automate database processing, and accelerate UI/UX development, resulting in a 50% improvement in coding efficiency and rapid mastery of new technologies.

EDUCATION

HUTECH University	Bachelor's Degree
Software Technology	Information Technology • 2020 - 2024

EXPERIENCE

HEALTHCARE SOLUTION VIETNAM	Software Engineer (Full-Stack)
11/2025 - Present	

- Independently perform requirement analysis to propose logical business flows and design robust database schemas for various healthcare modules.
- Ensure data integrity and optimized storage across all database designs.
- Demonstrate strong adaptability by expanding technical scope beyond .NET, contributing to full-stack feature development and front-end integration using Java, ReactJS, and NestJS (implementing robust CRUD operations).
- Design and implement system architectures tailored to specific project needs.
- Focus heavily on high scalability, modularity, and long-term maintainability.
- Enhance data retrieval performance and system efficiency by authoring and managing complex Stored Procedures.
- Leverage AI tools (ChatGPT, Google Gemini) to read documentation, analyze databases, and reference solutions, boosting overall code quality and productivity by 50%.
- Utilize AI Stitch for rapid UI/UX building and Antigravity to streamline the coding process.

KYANON DIGITAL	Software Engineer (.NET)
05/2024 - 03/2025	

- Successfully transitioned from an internship and probationary role by consistently delivering high-quality work, earning management trust to take ownership of critical project tasks.
- Maintained and enhanced the OCBC point redemption application for OCBC Singapore Bank.
- Improved feature set and system reliability for the OCBC application.
- Developed Discount Bites, a discount food ordering application, using Strapi and Node.js.
- Successfully delivered key functionalities outside core team expertise for Discount Bites.
- Optimized and extended the Tangs e-commerce platform.
- Refactored event-handling logic and implemented new features to improve user experience and system performance for Tangs.

<>

KEY PROJECTS

DiscountBites

01/2025 - 03/2025

- Description:** A discount food ordering application.
- Tech Stack:** Strapi, Node js, PostgreSQL.
- Outcome:**
 - Developed merchant product recommendations based on distance using latitude, longitude, and GeoHash.
 - Enhanced user experience by accurately suggesting relevant nearby restaurants.
 - Built custom APIs for Search, Favourite Merchant, Product, Category, Home-Customer, and Home-Merchant.
 - Optimized database queries for better performance.
 - Built the project from scratch while learning Strapi.
- Client:** Singapore.

OCBC

11/2024 - 12/2024

- Description:** A loyalty point redemption application for OCBC Bank Singapore.
- Tech Stack:** .NET Core, PostgreSQL, Redis, SignalR.
- Outcome:**
 - Developed Concurrent Login Detection, leveraging Redis to track active device sessions and enhance account security. Implemented a Special Discount feature to provide personalized promotions.
 - Refactored and optimized source code, improving system maintainability and performance.
- Website:** <https://marketplace.stackreward.com> | **Client:** Singapore.

Tangs

08/2024 - 10/2024

- Description:** Large-scale e-commerce platforms.
- Tech Stack:** .NET Core, PostgreSQL, Kafka.
- Outcome:**
 - Refactored event-handling logic for Unbxd.
 - Wrote unit tests to ensure code reliability.
 - Website:** <https://tangsgroup.com> | **Client:** Singapore.

>>

SKILLS

Programming Languages: C#, Java, JavaScript/TypeScript, ReactJS (basic).

Backend: .NET Core, NestJS, Node js, Restful API, DTO, Clean Architecture, Middleware, CQRS.

Database: PostgreSQL, MySQL, MS SQL Server, Database Design, Stored Procedures.

AI & Tools: ChatGPT, Google Gemini, AI Stitch, Antigravity, Git, GitHub, GitLab, Docker, SCP Deployment, Postman, Swagger.

Security & Performance: Authentication & Authorization, JWT, CORS, Retry, Rate Limiting, Hangfire, Redis Cache

Testing: Unit Testing, SonarQube, Logs/Logging.

Soft Skills: Requirement Analysis, Logical thinking, Teamwork, Problem-solving, Quick adaptability, Communication, Effective time management.
